

Recycling your Commercial and Industrial ... Plastics ...

Expanded Polystyrene (eps, styrofoam)

Do you have a polystyrene disposal problem?

Are you throwing your polystyrene in the bin?

Is it taking up valuable room in your rubbish skip?

We can help you.....

Polystyrene is a difficult material to recycle. It has a high volume and low mass, the very reasons that make it desirable as a packaging material also make it difficult to recycle.

We aim to provide you with a reliable and cost efficient collection service or a drop off point for those who wish to self deliver. We specialise in building long term relationships with our customers, and are happy to work with you to provide a sustainable solution to your recycling needs.

CLAW Environmental has over 10 years experience in the recycling of plastic and the current owners have over 20 years experience in the recycling industry. We are the only EPSA registered recycling service in Western Australia for expanded polystyrene (EPS).

Phone us if you want to save your business money and help the environment by ensuring that none of the material collected will end up in land fill.

What Happens to the EPS?

We can collect your EPS or you can deliver to our site. EPS must be clean and free of stickers, tape and dirt.

Collection

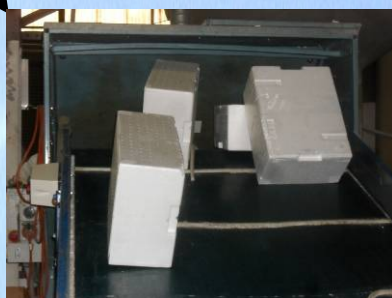

What benefits do I get from Recycling my EPS?

- cost saving - \$ v landfill
- environment - reducing the volume of material going to landfill
- can be recycled many times reducing the consumption of raw materials

Self Deliver

Granulation

Reduces the size of the EPS using rotating arms to break up the large pieces.

We also recycle.....

Polyethylene – High Density
Drums, bins, pipe, bottles,
IBC's

Polypropylene
Crates, cable reels, pots

Compression

The EPS is compacted to increase the density by up to 20 times using a screw compactor.

How do I get started ?

Ring us for a free consultation on recycling your plastic

EPS is stored prior to loading for export for manufacture into new products.
