

# What Happens to your Polystyrene?

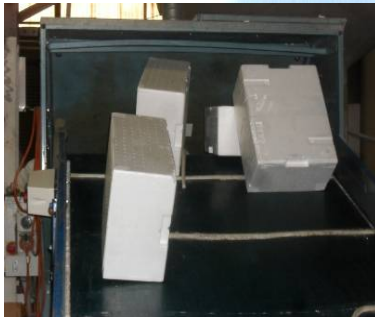

## Expanded Polystyrene (EPS)

( computer/white good packaging, eskies, insulation panels )

Self Deliver  
or  
Collect

You can deliver to our site in Welshpool free of charge or we can collect for a fee. EPS must be clean and free of stickers, tape, dirt and other contaminants.

Granulate

The EPS is reduced in size by a set of rotating steel bars to break up the large pieces. This is blown into a large storage bag where gravity works its magic.

Compress

The EPS is compacted to increase the density by up to 20 times using a cold screw compactor into a continuous log.

Store

EPS is stored on pallets prior to loading in containers for export. This will be pelletised for manufacture of new products such as picture frames, 'faux wood' architraves / mouldings and coat hangers.

Site Address:  
5 Forge St (Rear), Welshpool, 6106  
Phone: (08) 9333 4888
